Format for user stories:

As a *< user, role>*, I want *< feature, functionality>* so that *< some reason/benefit / value >*

Here are our 15-20 user stories for Deliverable 0

1. As a Student, I should be able to search for jobs in my field so that I can apply for a new job.
2. As an Employer / Company, I should be able to add a new job listing for my company that people can apply for.
3. As a Student, I should be able to follow the Company that I am interested in so that I know if they post any new positions that I think might be interesting for me.
4. As a Company I should be able to have a description of my company and what my company does so people who apply for a job for us know what we do before the hiring process.
5. As a Company I want to have an “Easy Apply” process so that it is easy and quick for students to apply for the jobs that we are posting.
6. As a Student I want to be able to add a bio about myself and some of the projects and skills that I have so that companies can look at it and see if it might be a good fit for their job and might reach out to me.

7. As a college student, I want a platform that connects me with part time jobs so that I can utilize my skills I have learned in school for a competitive wage.
8. As a college student, I want a platform that does not have a degree requirement so that I can apply for jobs that match my skill set and not have to worry about my experience not matching requirements.
9. As a college student, I want a platform that tailors to smaller/part-time jobs so that I still have time for school work itself.
10. As a company, I want a platform that connects me to students with technical skills I am looking for to hire part-time.
11. As a company, I want a platform that allows me to post job listings specifically for college students to increase my chances in finding part-time help.
12. As a company, I want a platform that connects me to students who want a part-time job for the learning experience to reward students for trying to learn rather than just working for money.
13. As a company, I want a platform that has a rating system for me to attract even more students if I am in fact a good fit for students.
14. As a Designer, I should be able to create and allow students to use a search filter to filter their job searches so that they can find jobs that are more suitable for them and their requirements.
15. As a Designer, I want to create a platform that lists a vast selection of jobs that align with college students' majors to increase the chance of them finding a job.
16. As a user I want to be able to showcase my skills and get a reliable part time job that differs from contracts.
